

Riding the Wind to a Cleaner Planet

August 17, 2020, 7:00-8:30 pm PDT

Join us as faith leader and filmmaker **Jo Carson** discusses the new importance of local, smaller wind energy projects.

- * Why wind energy is a practical and powerful addition to green energy solutions.
- * Where is the wind capacity in Marin and the greater Bay Area?
- * Local solutions vs. outsourcing: public safety and environmental justice
- * Advantages & disadvantages – economic, ecological, predictability/reliability
- * **Peter Asmus**, Research Director, Guidehouse Insights, speaks briefly on micro grids and distributed power sources vs. grid stability threats and PG&E shut-downs, safety, government restrictions, getting wind projects off the ground.
- * The Paris Climate Accord and COVID-19: the urgency of now
- * What interfaith groups can do and what you can do
